

## FX 962: Improved Formulation

Thanks to its high flexibility and laminating ability, **Mara® Flex FX** has become a reliable partner for the production of identity cards. By replacing a raw material, the colour shade **Mara® Flex FX 962** can now be produced without the use of solvents containing aromatics.

All other properties remain unaffected by the change.

The change in formulation will therefore be implemented with immediate effect.

For further information on **Mara® Flex FX** please refer to [www.marabu-inks.com](http://www.marabu-inks.com)

### Date of Change-Over

This change becomes effective starting with batch 116 (immediately). You will find an additional remark on the can stating:

**„Attention: Improved Formula“**
